

Amazon - Inbound Preferred Carrier

Edge can access Amazon's Inbound Preferred Carrier Programme (IPCP) through Palletline with fixed delivery time slots at every FC (Fulfilment Centre).

- 🕒 Fast and reliable
- 🕒 Minimizes the risk of financial penalties
- 🕒 Simple to use with minimal additional administration

You manifest your consignment with the following mandatory information:

- 🕒 Amazon vendor:
 - ASN, Amazon ref ID (PO), carton & unit count
- 🕒 Amazon Seller:
 - FBA, Amazon ref ID (PO), carton & unit
- 🕒 Correct Royal Mail postcode for the specific FC
 - There is a useful list at the end of this document
 - An incorrect postcode will mean that the consignment is sent to an incorrect FC and charges may be incurred re-routing

Amazon dictate to Palletline which consignments they will accept into each fulfilment centre based on their internal priority system. We have no control over this.

Please manifest with 48-72 hours remaining of the shipping window. This enables us to collect and process your delivery through Palletline so that they can request a delivery slot within the shipping window.

It is also more cost effective as you can manifest on an B (economy) service as long as the manifested delivery date falls within your shipping window.

Amazon Guidelines

You must ensure that your goods meet your Amazon presentation criteria as they will reject pallets which do not meet the required standard or are not correctly labelled. Rejected pallets may need to be returned to you, at your cost.

The Process

- 🚚 Palletline will request a delivery slot for your consignment as soon as the goods arrive at a Palletline hub, but cannot guarantee a specific delivery date, as this is driven by Amazon.
- 🚚 If the delivery slot requested is within your shipping window, then you will not incur any Amazon financial penalties.
- 🚚 Once booked in, the local Palletline depot will deliver into the FC on their pre-arranged booking which could be:
 - Live load - where the freight is offloaded and a POD provided immediately
 - Trailer drop - where the freight is offloaded at a late time (determined by the Amazon FC) and the POD is provided when the empty trailer is collected
- 🚚 The FC will provide a signed or stamped manifest as proof of delivery but will not accept any customer specific paperwork
- 🚚 Once receipted by Amazon, you will be able to check receipt of the goods on your vendor/supplier portal
- 🚚 The Palletline depot will scan and upload the POD so it is visible on the portal typically 24-72 hours after the booking.
- 🚚 From time to time an Amazon fulfilment centre may suspend service
 - We have no control over this but receive notification from Palletline with instructions not to send any freight forward until the suspension is lifted
 - Any of your orders for that FC will be held pending the suspension being lifted or can be returned to you, at your cost.

Amazon FC Postcodes

FC	Postcode	FC	Postcode
BHX1	WS15 1LX	LCY2	RM18 7AN
BHX2	LE67 1GQ	LCY3	DA1 5XU
BHX3	NN11 8QL	LPL2	L33 7AP
BHX4	CV5 9DQ	LTN1	MK43 0ZA
BHX5	CV23 0XF	LTN4	LU5 4TT
