

Micro Pallets

Looking for a cost effective solution for your smaller pallets?

Introducing our new Micro Pallet specification:

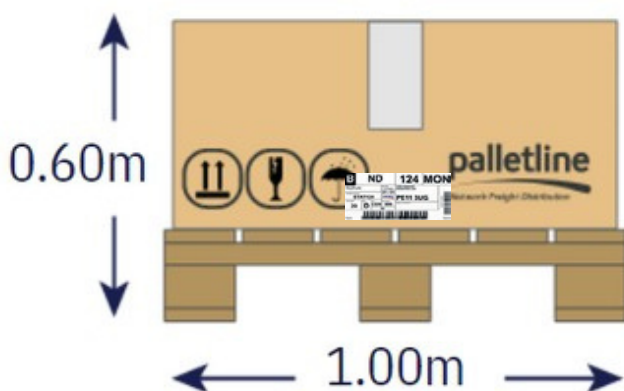

Pallet dimensions not exceeding:

Weight 150kg

Width 1.00m

Depth 1.20m

Height 0.60m

Cost effective

Competitive

HOW IT WORKS

Manifest your consignment as Quarter Pallets and activate the Micro Pallet toggle.

All the Quarter pallets that are less than 150kg for that consignment will then be amended to Micro pallets within our traffic management system.

Any labels printed will show Quarter pallet but don't worry, we will reprint the labels once the micro pallet adjustment has been made.

If you need to edit any details then please email Traffic@edgetransport.co.uk.

Please do not make any changes on the portal as this will re-rate the pallets as quarters and affect the cost.
